

BELLO JAMIU ISHOLA

Senior UI/UX Designer & Full-Stack Developer (Web, Mobile, IoT)

Lagos, Nigeria (Open to Remote Worldwide) • jamibelbello0104@gmail.com • +234 905 095 5981 • ishobelabello.space

PROFESSIONAL SUMMARY

Versatile UI/UX Designer and Full-Stack Developer with 6+ years of engineering experience crafting modern, glassmorphic interfaces, high-performance cross-platform mobile apps (Flutter, React Native, native Android), and scalable cloud-native web platforms (React, Next.js, Firebase, Supabase, Node). Specialist in bridging human-centered design systems with robust offline-first sync architectures, real-time community chat platforms, and enterprise IoT/network automation infrastructures.

CONFIDENTIALITY / NDA NOTICE:
A substantial portion of my design and production engineering work has been built under strict Non-Disclosure Agreements (NDAs) for enterprise clients, fintech platforms, and private organizations. The systems detailed below represent an authorized selection of public projects.

CORE TECHNICAL COMPETENCIES

UI/UX & Design Systems: Figma, Adobe XD, Wireframing, Glassmorphism, Micro-interactions, Design Tokens, User Journey Mapping
3D & Creative Web: Three.js, WebGL, GLSL Shaders, Draco / GLTF 3D Optimization, Canvas API, Framer Motion, Anime.js, Tailwind
Mobile Engineering: Flutter, Dart, React Native, Expo, Android Studio (Java & Kotlin), SQLite, Isar, Offline-First Sync, FCM
Frontend & Web Platforms: React 19, Next.js 15 (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, shadcn/ui, Recharts, Vite
Backend, Cloud & IoT: Supabase (PostgreSQL, RLS, Edge Functions), Firebase (Firestore, Auth), Node.js, Network / IoT Automation

SELECTED EXPERIENCE & PRODUCTION SYSTEMS

ForteSoft NIIT — UI/UX Design & Mobile Engineering Lead

2023 – Present

UI/UX Designer & Mobile App Developer • fortesoft.com | ishobelabello.space

Tech: Figma, React Native, Java, Android Studio, Firebase, WebSockets

- Spearheaded user research and produced design systems, interactive prototypes, and glassmorphic UI components in Figma.
- Engineered real-time chat architectures and student community feeds with low-latency messaging, active state sync, and file sharing.
- Streamlined mobile onboarding flows, increasing overall user conversion by 45% and slashing drop-off rates.

V2D Convergence — Network Infrastructure & Systems Specialist

2022 – 2023

Network Engineer • v2dconvergence.com

Tech: VLANs, Cisco Routing, IoT Sensors, CCTV Telemetry, Network Security

- Designed, deployed, and maintained enterprise networking, smart IoT automation systems, and surveillance telemetries.
- Optimized routing protocols, network security policies, and fault-tolerant hardware architectures achieving 99.9% uptime.

NutriCare — AI Senior Nutrition & Health Platform

Jan 2024 – Present

Lead Full-Stack & Mobile Developer • nutricareelderly1.vercel.app

Tech: Flutter, Dart, React, Tailwind CSS, Next.js, Kotlin, Supabase

- Engineered cross-platform mobile and web application in Flutter, Dart, and Supabase, serving 1,000+ active seniors with a 4.9/5 rating.
- Developed dietary algorithm calculating glycemic impact across 50+ dishes for elderly users managing diabetes and hypertension.
- Built background native medication alerts with drug-food interaction checks and encrypted Supabase cloud synchronization.

MoniePal — Fintech Savings & Digital Wallet Platform

Jun 2023 – Dec 2023

Full-Stack Developer • mymoniepal.com

Tech: React, TypeScript, Firebase, Tailwind CSS, Progressive Web App (PWA)

- Architected group savings (Ajo/Esusu) and digital wallet platform handling real funds with atomic balance updates and bank-grade encryption.
- Built progressive web app offline sync and real-time transaction reconciliation with zero balance discrepancy.

BookUp — Student-Tutor Community & Learning App

Jan 2023 – May 2023

Full-Stack Mobile & Web Developer • bit.ly/bookup-app-install | book-up-ten.vercel.app

Tech: Android Studio, Java, Firebase Realtime Database, React, Vite, PWA

- Developed dual-platform ecosystem: native Android mobile app (Java) and responsive React web platform (PWA).
- Built real-time community feed, instant messaging channels, and tutor matching workflows with offline resource caching.

Ops4Ease & Depeace Travel — SaaS & Global Booking Platforms

2022

Full-Stack Web & SaaS Developer • ops4ease.com | depeacetravels.com

Tech: React, TypeScript, Vite, Supabase, Firebase, Tailwind CSS, shadcn/ui

- Engineered all-in-one SME business operations SaaS platform with task tracking, attendance, HR, and analytics (Ops4Ease).
- Delivered travel and pilgrimage booking platform with dynamic Supabase CMS, increasing inquiry conversions by 45% (Depeace).

CERTIFICATIONS & LANGUAGES

Certifications: Certified UI/UX Design Specialist (Figma) • Advanced Flutter Mobile Architecture • Enterprise Cloud & Database Engineering
Languages: English (Native / Full Professional Proficiency), Yoruba
